MOORMBOOL WEST

# DARGILE COUNTY OF RODNEY

Scale 40 Chains to 1 Inch

## REFERENCE

Recent & Alluvial		River flats-soil and gravel	
		Hill wash, etc.	
Tertiary		High level gravels	
Silurian		Interbedded conglomerates	Mount Ida Beds
		Pleurodictyum Beds	
		Pentamerus Beds	
		Early Spirifer Beds	McIvor Beds
		Upper Camarotoechia Beds	
		Grummysia Band	Dargile Beds
		Lower Camarotoechia Beds	
		Encrinurus-Chonetes Mudstone	
		Dargile Sandstones and Conglomerates	
			Graptolite Beds
		Lower Dargile Mudstones	
Cambrian	Middle		(Interbedded Ashes, etc.) Dinesus Hydroid Beds
			Cherts
	Pre-Middle		Schistose Diabase
	Undifferentiated		Ashes and Tufts
			Agglomerates
			Dolerites

Dip and strike  $\gamma$  Auriferous reefs  $\backslash$  Alluvial gold  $\cdot\cdot\cdot\cdot$  Fossil localities  $\textcircled{1}$   
 Rock specimens  $\textcircled{2}$  Approximate contours  $\text{---}$  Porphyry dykes  $\text{---}$

## NOTES

- ① Conglomeratic sandstones and quartzites.
- ② Rindered ranges, mainly sandstones containing shelly fossils.
- ③ Highly contorted schists in road cutting.
- ④ Bedded ashes, fine grained diabase and agglomerates.
- ⑤ Foliated diabase with much magnetite in road cutting.
