

Printed in Colors from Stone at the Crown Lands Office, Melbourne.

Surveyed, Engraved & Published under the direction of Alfred R.C. Selwyn, Chief Geologist, DEPARTMENT OF PUBLIC LANDS, VICTORIA. C.D.B. Aplin, Assistant. J.D. Brown, Engraver. J. Wilkinson, Draughtsman.

PART OF BOROONDARA

Note 1.

Some of the quartz from this reef has yielded 30 Oz. to the ton at a depth of 160 ft. also on the strike both North & South the quartz has vein out a close clay joint containing neither gold nor Antimony being the only indication left of the position of the vein. The Auriferous portions of the vein have throughout contained large quantities of Sulphuretted Oxide of Antimony.

1 NE

Legend and scale information including symbols for Alluvial, Post Pliocene, Rainfall basins, and various geological units like S.1. Sandstone, S.2. Shales & Mudstone, and S.3. Conglomerate. Includes a scale of 100 inches to a mile.
